**Utica Park Clinic - Jenks Celebrates
Ground Breaking at Village on Main**

Jenks, Okla. – Utica Park Clinic - Jenks, along with officials of the Village on Main, announced today that it will celebrate its ground breaking ceremony on Thursday, August 6, 2009 at 11:30 AM at the Village on Main development site, 607 East Main Street in Jenks.

While the current Utica Park Clinic – Jenks facility measures 3,400 square feet, the new 22,000 square-foot medical facility will be the first business to break ground as an occupant of the Village on Main, a \$60 million, 420,000-square-foot retail, office, residential and hotel development project. Of note is the project’s design, which will be beneficial to surrounding commercial districts as well as the entire metro area.

The Village on Main will be constructed during the next three years and will include a 1,600 foot road that will fork off Main Street to the southeast. The road may be closed at certain times to accommodate concerts, festivals and other events.

Utica Park Clinic – Jenks has been an established practice in Jenks since 1998 and the practice as well as the physicians associated with it will move just a few blocks down the road to a new facility at the Village on Main upon completion. The new UPC – Jenks facility will offer amenities such as increased and more convenient parking; an expanded, upscale clinical setting that doesn’t resemble a medical office building; a childrens’ play area; x-ray, laboratory, dexascan and mammography services; and six physician offices initially with room to expand to 12 offices on the second floor.

The ground breaking ceremony will be hosted by County Commissioner Karen Keith. Utica Park Clinic CEO Dan Ramsey and Jenks Mayor Vic Vreeland are also scheduled to speak. Refreshments will be provided. Media opportunities for photo, video and interviews will be available.

Utica Park Clinic, a service of Hillcrest HealthCare System, is one of the largest physician groups in Oklahoma, with physicians who practice in a wide range of areas and specialties, in many communities throughout Oklahoma.
